

Package ‘bndesr’

June 7, 2023

Title Access Data from the Brazilian Development Bank (BNDES)

Version 1.0.3

Description Allows access to data on BNDES disbursements and contracts since 1995. The package makes it easy to import data from the bank into R.<https://www.bndes.gov.br/SiteBNDES/bndes/bndes_en>.

License MIT + file LICENSE

Encoding UTF-8

RoxygenNote 7.2.3

Imports curl, dplyr, janitor, lubridate, RCurl, readr, readxl, stringr

Suggests testthat (>= 3.0.0)

Config/testthat/edition 3

NeedsCompilation no

--------------	----------

query_bndespar_desimbursements

Queries BNDESPar desimbursements data

Description

Downloads data from BNDESPar desimbursements since 2007 and return it in the form of a dataframe.

Usage

```
query_bndespar_desimbursements(year = "all")
```

Arguments

year selects the years which data will be downloaded. integer.

Value

a dataframe with the data

Examples

```
df <- query_bndespar_desimbursements()
```

query_bndespar_portfolio

Queries BNDESPar portfolio data

Description

Downloads data from the portfolio since 2006 and return it in the form of a dataframe.

Usage

```
query_bndespar_portfolio(year = "all")
```

Arguments

year selects the years which data will be downloaded. integer.

Value

a dataframe with the data

Examples

```
df <- query_bndespar_portfolio()
```

query_contracts	<i>Query the data of the loan contracts made through the National Bank for Economic and Social Development (BNDES).</i>
-----------------	---

Description

Downloads contracts data for the selected years, since 2002, and return it in the form of a dataframe.
Note: to access the total amount disbursed, use the function `query_desimbursements_data()`.

Usage

```
query_contracts(year = "all")
```

Arguments

year selects the years which data will be downloaded. integer.

Value

a dataframe with data for the selected year.

Examples

```
## Not run: query_contracts(year = 2012)
```

query_desimbursements	<i>Query data on loan disbursements made through the National Bank for Economic and Social Development (BNDES).</i>
-----------------------	---

Description

Downloads the data on loan disbursements for the selected years, since 1995, and return it in the form of a dataframe.

Usage

```
query_desimbursements(year = "all")
```

Arguments

year selects the years which data will be downloaded. integer.

Value

a dataframe with data for the selected year.

Examples

```
## Not run: query_desimbursements(year = c(1999:2010))
```
